A Framework for International Nodes in Private LOCKSS Networks

• Overview of Private LOCKSS Networks
• The benefits of international nodes in PLNs
• A framework for international nodes
• As distinguished from the Global LOCKSS Network
• Private LOCKSS Networks (PLNs) are created for the use by a particular community
• Self-governing, self-sustained
• Supported by LOCKSS or by members
The COPPUL PLN
The benefits of international nodes

- They allow PLNs with fewer than 7 members to reach the minimum that LOCKSS recommends
- They offer wide geographic distribution of content
- They offer protection against a single country’s censorship
• Service reciprocity
• Articulation with partner PLN frameworks / agreements
• Privacy, copyright, and other foreign laws and regulations
