Glossary

AIP	Archival Information Package, one of the basic containers for content in the Open Archival Information Systems (OAIS) Reference Model.
Archivematica	An Open Source digital preservation platform, http://archivematica.org/
Bag	A directory of files and metadata adhering to the BagIt specification, http://tools.ietf.org/html/draft-kunze-bagit
ETD	Electronic Thesis or Dissertation
ETD-MS	A descriptive metadata standard for describing Electronic Theses and Dissertations. http://www.ndltd.org/standards/metadata/etd-ms-v1.1.html
IR	Institutional Repository
METS	Metadata Encoding and Transmission Standard, an XML format for storing administrative, descriptive, technical, and structural information about a resource.
Microservice	A program that performs a specific, discrete task. Microservices are often chained together to perform a set of related tasks.
processingMCP.xml	A file used by Archivematica to encode workflow decisions. Use of this file allows digital preservation workflows within Archivematica to be selectively or fully automated.
REST	A standard for allowing software to communicate using URLs.
structMap	The part of a METS file that describes how the files that make up a digital object relate to each other.
TRS	Simon Fraser University's Thesis Registration System
