

MANAGING DISCOVERY AND LINKING SERVICES

May 27 – 30, 2015

Leanna Jantzi, Capilano University

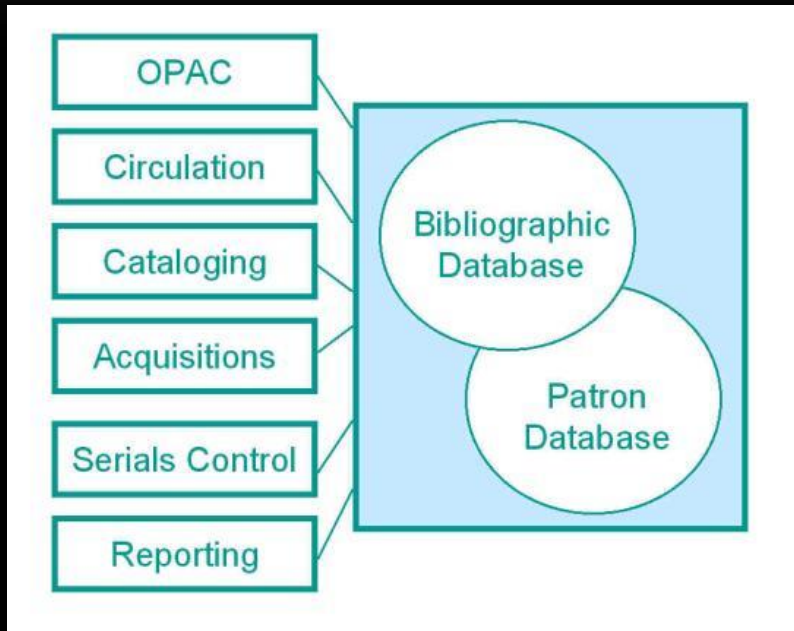

Jennifer Richard, Acadia University

Sandra Wong, Simon Fraser University

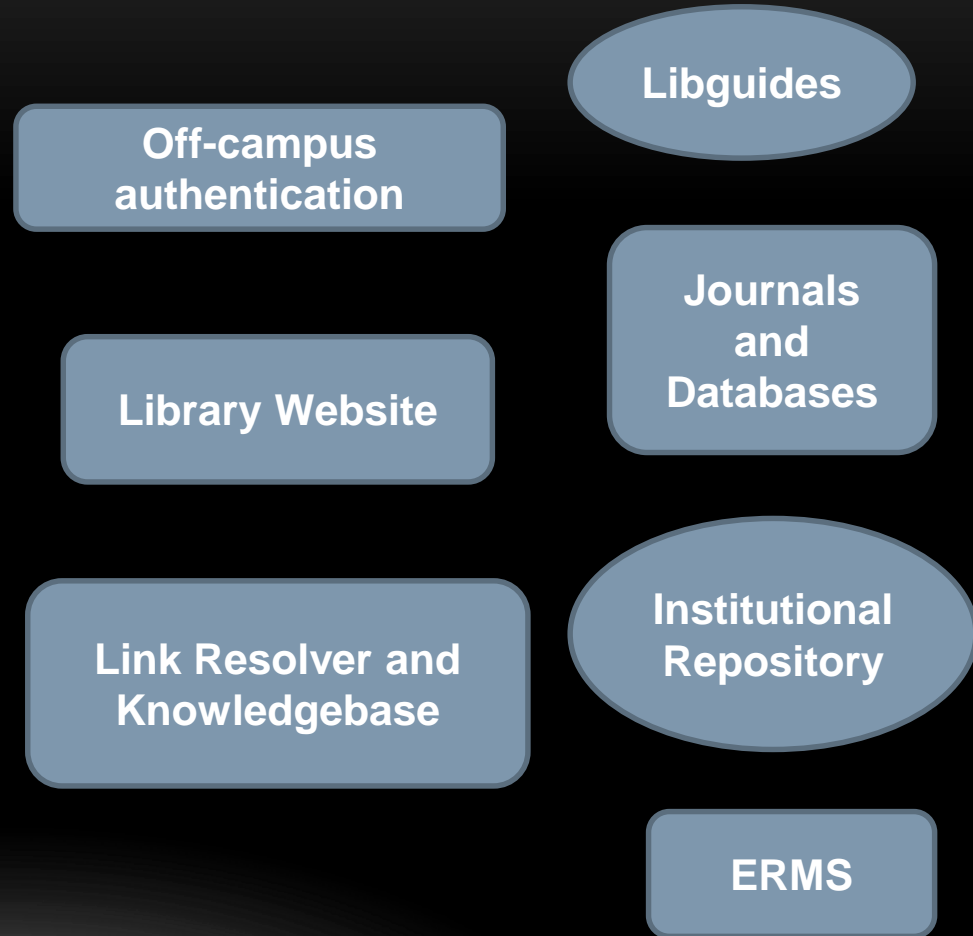

AGENDA

- Trend towards consolidation of services for Discovery, Link Resolving and ERMs.
 - About SFU's reSearcher suite (CUFTS/GODOT)
 - Case Studies:
 - Simon Fraser University – Proquest's Summon
 - Acadia University – Ex Libris' Primo
 - Capilano University – EBSCO Discovery Service (EDS)
-

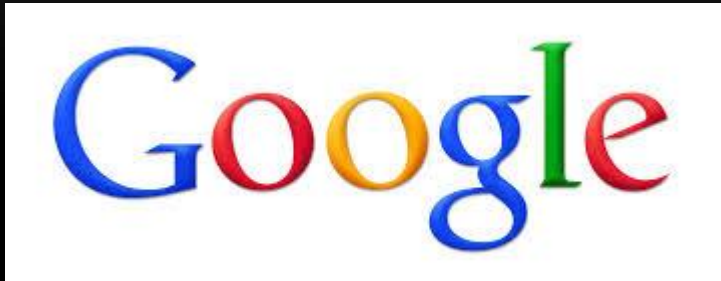

ACADEMIC LIBRARY - MULTIPLE SYSTEMS

<http://ihome.ust.hk/~lblkt/diploma/libauto/libauto.html>

WEB SCALE DISCOVERY

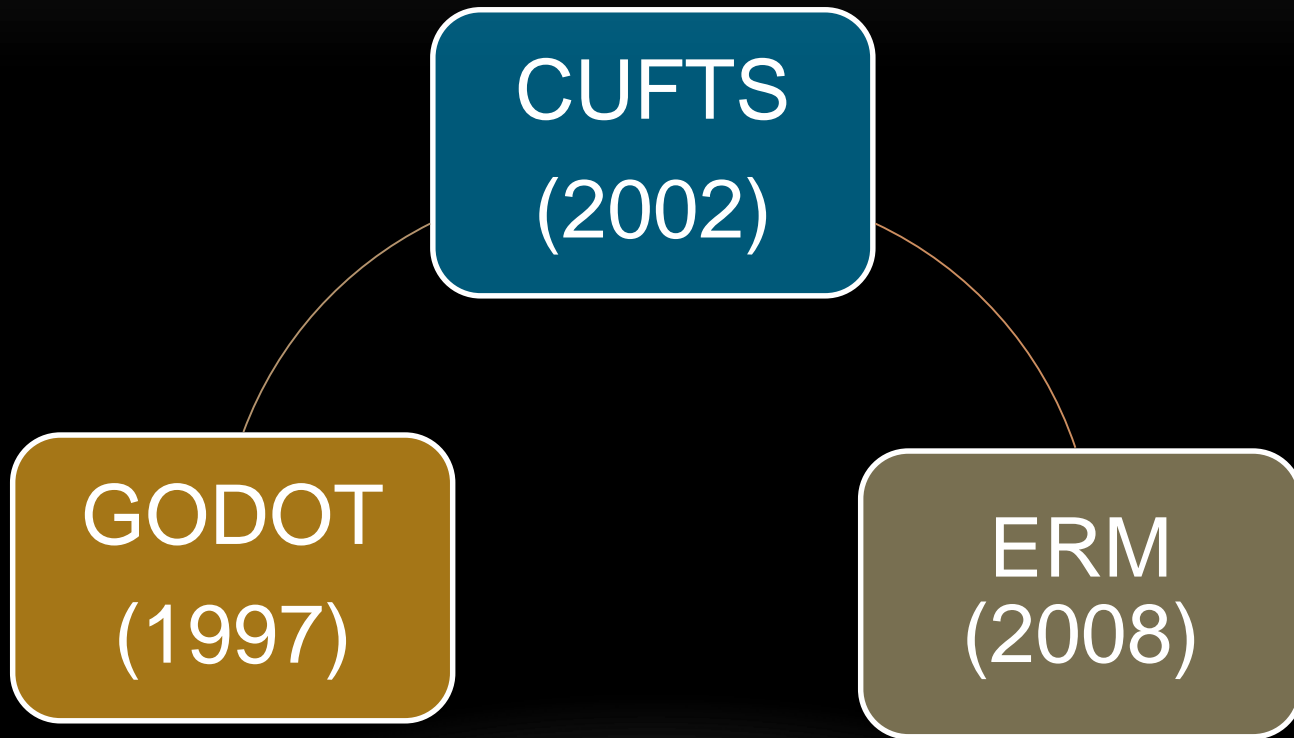

Federated Searching Tools

Discovery Layer

CONSOLIDATION OF LIBRARY SERVICES

reSearcher Suite Components

ABOUT CUFTS / GODOT – OPEN SOURCE

■ CUFTS

- The knowledgebase
- CJDB: Public A – Z electronic journals listing
- <http://cufts2.lib.sfu.ca/CJDB4/BVAS>

■ GODOT

- OpenURL link resolver and ILL/doc del requesting software.
- Searches CUFTS and partner library catalogues.
- Auto populates interlibrary loan forms with data – unmediated requesting.

CUFTS ERM – OPEN SOURCE

- Electronic Resource Management System
- Resource and License records.
- Provider records (publishers/platforms, institutional administrator logins).
- Basic COUNTER data storage and SUSHI retrieval for usage statistics.
- Public A – Z listing of databases (CRDB)
- <http://cufts2.lib.sfu.ca/CRDB4/BVAS>

SIMON FRASER UNIVERSITY

Medium sized public university offering undergraduate and graduate degrees. 20 203 FTEs.

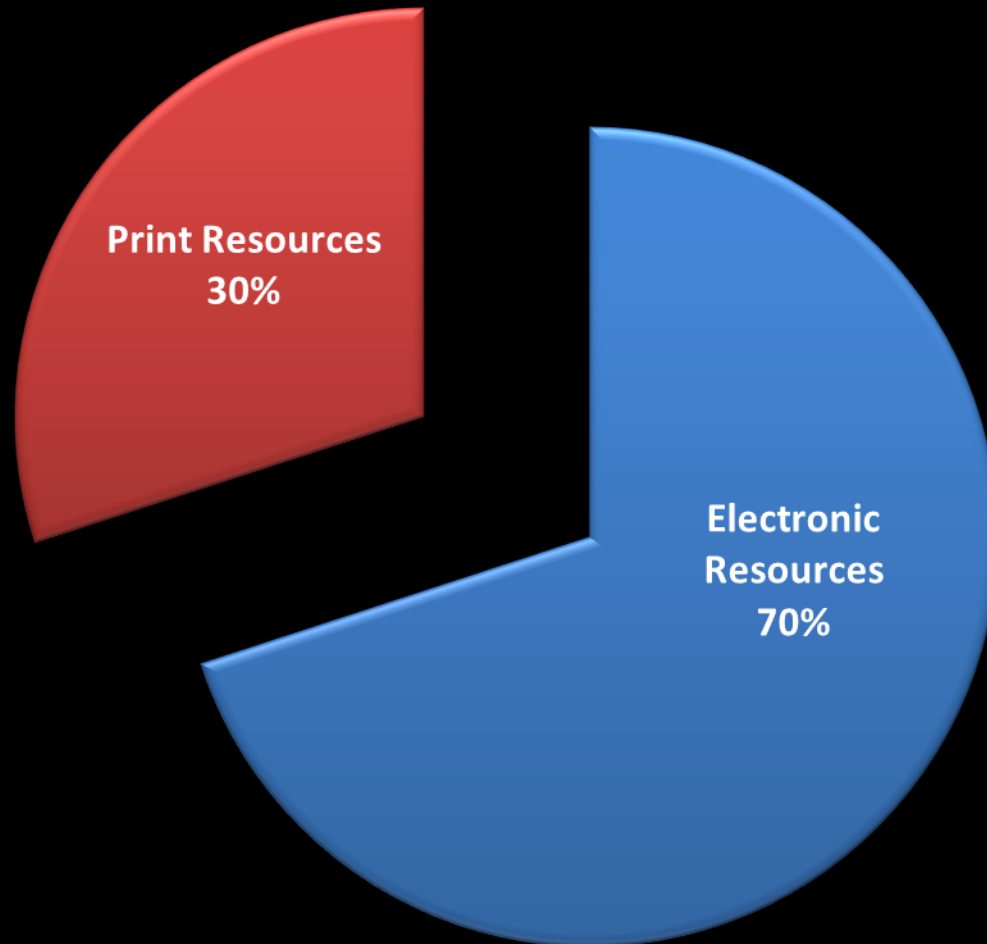

3 campuses (but single site status – one administration/president).

No medical school (but Faculty of Health Sciences).

No law school (but School of Criminology).

SFU Collection Information

\$ 9.4 million Canadian

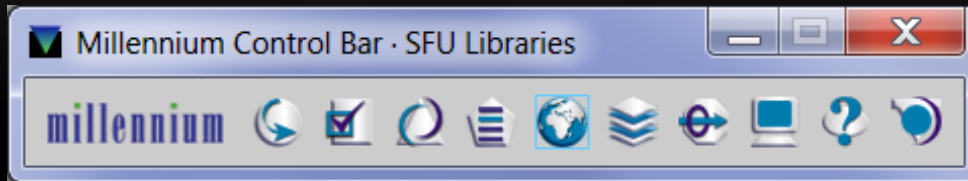

E-journals: 118 005

Databases: 722

E-books: 1.1 million

SFU SYSTEM INFORMATION

SUMMON

FAST SEARCH

- Signed up in Spring 2010.
- We branded it Fast Search in case we decided to switch vendors at a later date, didn't want to be tied to the Summon brand name.
- Catalogue records delivered daily by FTP.
 - Scripted and automated.
- Electronic journal holdings added through the Serials Solutions Client Center and 360 Core.

DUAL KNOWLEDGBASE MANAGEMENT

Serials Solutions
360 Core

TYPES OF TARGETS IN A KNOWLEDGEBASE

1. Auto-activated targets

- Aggregator packages: EBSCO, Gale, Proquest full text databases.
- Big Deal Packages:
 - ACM Digital Library, JSTOR Archive collections, Project Muse

2. Managed targets – partially activated

- We subscribe to only some of the titles in this database.
- Library specific holdings/entitlements.
 - Ingenta Connect (136 of 6554)
 - Highwire Press (78 of 1443)

HOW TO MANAGE 2 KNOWLEDGEBASES

- CUFTS takes priority because it is our primary A-Z journal listing and knowledgebase for our link resolver.
- The Summon knowledgebase is only for indexing purposes – not for full text linking.
- Index-enhanced linking (direct linking) not introduced until 2011 in Summon.

FAST SEARCH

- Staff pages (employees only)

SERIALS SOLUTIONS 360 CORE - TIMELINE

- 2011 – project given to technical services support staff to update holdings in Serials Solutions once/year.
- Support staff not familiar with publishers, providers, platforms and licenses to make independent decisions.

LACK OF STANDARDIZATION ACROSS KBs

- Different names for the targets and providers.
- Different # of titles in similar sounding targets between CUFTS and 360 Core.
- Multiple targets to choose from, including potentially ceased targets.
- This work required a level of knowledge/familiarity with license terms and journal publishing to select the appropriate target and apply updates.

SERIALS SOLUTIONS 360 CORE - TIMELINE

- 2013 – Continue with minor maintenance to account for platform changes for publishers, journal transfers, new databases and cancellations.
- 2013 – Serials Solutions reveals unique 3 digit code for databases/targets in 360 Core.
- 2014 – SFU investigates automated procedures for updating our holdings in Serials Solutions.

SFU

SERIALS SOLUTIONS CLIENT CENTRE - TIMELINE

- 2014/2015 – our systems analyst created a program using the 3 digit PQ code.
- Electronic Resources Librarian adds the PQ 3 digit code to partially activated resources.

PARTIALLY AUTOMATED SOLUTION

118 000 + Electronic Journals

CHALLENGES AND OBSERVATIONS

- At SFU, in spite of neglecting 360 Core for almost 4 years – relatively few reports of false hits and broken links for the size of our online collection.
- Patrons no longer reporting broken links and moving onto the next result.

Laboratory Animals

The international journal of laboratory animal science and welfare, *Laboratory Animals* publishes peer-reviewed original papers and reviews on all aspects of the use of animals in biomedical research. The journal promotes improvements in the welfare or well-being of the animals used, it particularly focuses on research that reduces the number of animals used or which replaces animal models with in vitro alternatives. This journal is a member of the **Committee on Publication Ethics (COPE)**.

Laboratory birds: refinements in husbandry and procedures S1:57

PART 2 SPECIES SECTIONS

16 Seabirds

Most research on seabirds involves field studies, and they are rarely kept in the laboratory for anything other than very short periods. Research projects using seabirds are generally energetic studies where precise measurements of energy balance and assimilation efficiency are required, or investigations of particular aspects of foraging behaviour such as diving performance. The difficulties in replicating natural conditions, and the changes in behaviour and physiology that are likely to occur, make seabirds unsuitable subjects for prolonged study in captivity.

There are a number of considerations that are particularly important when planning

endeavour to cooperate with such an establishment wherever possible. Swennen (1977) set up a large-scale research facility for keeping seabirds in The Netherlands. His publication provides a detailed account of the conditions required and of the problems likely to be encountered, but is poor in its guidance on environmental stimulation. Robinson (2000) provides guidance on water quality, seabird husbandry, parasites and diseases. It is also essential to search the literature to obtain as much information as possible on the ecology and behaviour of seabirds in general and the study species in particular (e.g. see Ashmole 1971, Nettleship & Birkhead 1985, Furness & Monaghan 1987 and references therein for general information).
