Interview questions to ask nurse educator

- 1) How is the triage education planned and executed? Are there particular steps? What is the relationship between workshops, coursework, practical training, etc?
- 2) How was the triage education changed/different in the period where you had eTRIAGE in the emergency department?
- 3) I guess that a huge part of becoming a triage nurse is about learning the specific language related to triaging patients. Did you detect any difference between the process of learning the language in the eTRIAGE period compared to when you use the paper-based system? Like, were there specific aspects that were easier or more difficult to learn (choosing the right form; choosing the right chief complaint)?
